

University Department Information System

Nikhil Tudaha, Rajas Bhatt, Seemant Achari

Normal Utility mode:

To run in the normal mode for utility purposes run the file Main.py

First run:

Make sure there is no **UDIS.db** already present in the **Backend** folder.
Set the credentials when prompted. You cannot move further without setting the credentials.

Subsequent runs:

Enter the credentials to authenticate login and access or modify or enter data as required.

Test mode:

To run in the Test mode, create a fresh file **UDIS.db** in the **Backend** folder and run the SQL queries present in the **BuildDB.txt** file.

Now run the **Test.py** file and redirect output test report to the console or any other text file as needed.
